COMFORT, CONTROL AND DURABILITY PERFECT FOR SEMI-OFF-ROAD CONDITIONS

The next generation Enduro Cross Country 2.0 is a compact, lightweight trailing arm suspension, designed for comfort, control and durability in semi off-road conditions including bitumen, graded dirt roads and corrugated roads for long distances.

A folded metal suspension arm is paired with a new remote reservoir shock absorber, providing efficient performance while maintaining a very compact, lightweight design that's 26kg lighter per axle than our previous Enduro Cross Country and has a total weight significantly lower than a corresponding beam axle configuration.

Additional features include automotive grade black eCoat finish for chip resistance, Australian made coil springs, maintenance free bushes and compatibility with drum or disc brakes in addition to AL-KO's new Tow Assist safety technology.

1. **C Channel design provides significant weight reduction**
Automotive grade premium black eCoat finish.
Lower unspung weight improves performance.
2. **New premium AL-KO remote reservoir shock absorber**
for premium performance on corrugations and graded dirt roads.
3. **Drum or Disc brake options to suit your preference.**
4. **Tow & Camber adjustment.**

Specification	ENDURO CROSS COUNTRY 2.0
Terrain Suitability	Bitumen & Dirt Roads including Corrugated Roads
Replaceable Stub Axle	-
Maintenance Free Bushes	✓
Shock Absorber	1 x Premium Shock Absorber with Remote Reservoir
AL-KO Premium Brakes	Off-Road Premium
Finish	Automotive eCoat
Wheel Travel	100mm
Suspension Height	145mm
Stub Overhang	177mm, 200mm
Maximum GTM Capacity	Single - 2300kg GTM Tandem - 3400kg GTM
Disc Brake Option	✓
Tow Assist Option	✓

AL-KO is so confident in construction and quality of Enduro that we offer a market leading 5 year warranty as standard.

The new AL-KO Remote Reservoir Shock Absorber

The new AL-KO Remote Reservoir provides premium performance on corrugations for long distances and graded dirt roads. The increased heat dissipation provided by the remote reservoir eliminates the need for 2 shock absorbers, saving weight without compromising on performance.
