

# ACCESS DOORS

Access doors have been built on site at our facilities here in Australia for many years with refined craftsmanship. Offering a tough, secure solution for tunnel and storage compartments doors, locker doors or general access hatches.

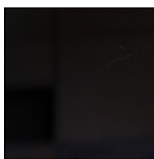

An integrated hinge preserves the aesthetic of the trim and provides a sleek finish to entry points. As AL-KO supply clad sheet and extruded profiles naturally, when combined with AL-KO's hardware range, the result is a seamless surface finish integration to your RV product.
