

# PROTECTOR SHADES

When selecting the protective layer to your vulnerable window, you need a stone guard fabricated to suit Australian conditions. AL-KO's Australian made stone guards don't only offer a smooth visual aesthetic, they are tough enough to shield windows from stray rocks and debris when touring. An added bonus is they seal seamlessly and offer shade during the day or black out annoying light during the night.

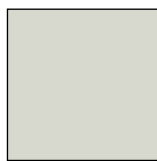

Protector shades can be supplied with stay attachments and easy to operate squeeze clips and when supplied with AL-KO's cladding sheets and extruded profiles range, the result is a seamless surface finish integration to your RV product.
